Education

**GOVERNMENT
POLYTECHNIC, NASHIK** (2023 - 2026)

DIPLOMA IN INFORMATION TECHNOLOGY
LAST SEMESTER PERCENTAGE - 89%

**BRIGHT ENGLISH MEDIUM
SCHOOL** (2022 - 2023)

SSC
PERCENTAGE - 90.40%

Skills

- Database Skills
- Programming Skills
- Git basics
- Time Management
- Problem-solving attitude
- Teamwork and communication

Kabir More

Full Stack Developer

About Me

I am a final-year Information Technology diploma student with a growing passion for exploring the depth and creativity of the tech world. Throughout my academic journey, I have developed a strong interest in Full Stack Development using Java, where I enjoy blending the structure of backend logic with the design of user-friendly frontends.

Driven by curiosity and a desire to build meaningful applications, I continue learning new tools, frameworks, and concepts that help me improve my skills. With each project and hands-on experience, I aim to move closer to becoming a confident full stack Java developer, ready to take on real-world challenges and contribute to innovative solutions.

Academic Projects

1. Student Management System

- Built using Java, JDBC, and MySQL
- Features: Add, update, delete, and view student records
- Learned CRUD operations and database connectivity

2. Predicting Mobile Battery Life

- Built using Python and machine learning libraries.
- Features: Collected usage data, trained a regression model, and predicted remaining battery life accurately.
- Learned data preprocessing, model training, evaluation techniques, and real-world prediction workflow.

Final Year Projects

Grahak Bhandar - Inventory Management Web Application

- Built using HTML, CSS, JavaScript, and PHP with MySQL for backend storage.
- Features: Product entry, stock updates, sales tracking, and automatic inventory management.
- Learned form handling, PHP-MySQL connectivity, CRUD operations, and building a functional full-stack web application.
